Speaker	Synopsis
<p>Mr. Elvis Li Vice President, Tecton Limited</p> <p>Mr. Li is the BIM and BLM consultant in Hong Kong and China. He has over 5 years of BIM & BLM experience from design visualization, rapid prototyping, design and drawing conflict identification, cost estimation, construction planning, RFID construction monitoring to 5D facility management in more than 20 projects.</p>	<p>What is BIM?</p> <p>In general, nowadays BIM is widely known as the creation and use of coordinated, consistent, computable information for the documentation of a building design, production of high-quality drawings, cost-estimates, construction planning and, eventually, for managing and operating the facility. It is an emerging information technology embracing the entire building industry and project life cycle. In Hong Kong some public and private developers and consultants have been implementing BIM in their projects and have fruitful results and feedback.</p> <p>The speaker – Mr. Elvis Li will share with you his real project experiences in BIM from different perspectives in this event as well as the advanced understanding of the theory of this terminology. BIM is not only a tool or process for workflow streamlining and outcome optimisation but also create a digital nervous system for communicating and responding rapidly among the stakeholders. It is the ultimate solution for business operation and change management lead to real sustainable success in this ever-evolving global industry.</p> <p>Real Project Experience of the application of BIM in BIM consultant discipline</p>
